

BOARD

design R.D.A.

Board è un tavolo con struttura metallo e piano legno, rettangolare, disponibile in versione fissa o allungabile.

Nel tavolo Board convivono alla perfezione un basamento in metallo verniciato di forma geometrica e un piano in rovere antico nodato disegnato da bordi con una sagomatura irregolare.

Board is a rectangular table with a metal structure and a wooden table top, and it is available in the fixed or extending version. In the Board table, a geometrically shaped metal base finds the perfect partner in a knotted aged-look oak table top designed by irregular-shaped edges.

Board es una mesa con estructura de metal y sobre de madera rectangular, disponible en versión fija o extensible. En la mesa Board conviven en perfecta armonía una base de metal barnizado de forma geométrica y un sobre de roble envejecido con nudos, perfilado por cantos con un conformado irregular.

Board est une table avec structure en métal et plateau en bois, rectangulaire, disponible dans la version fixe ou allongeable. Sur la table Board cohabitent à la perfection un piètement en métal verni à la forme géométrique et un plateau en chêne vieilli à nœuds dessiné par des bords avec un façonnage irrégulier.

Board ist ein Tisch mit Metallkorpus und einer rechteckigen Holzplatte, der in einer festen und in einer ausziehbaren Version erhältlich ist. Der Tisch Board vereint auf perfekte Weise ein Untergestell aus lackiertem Metall mit stark geometrischen Formen mit einer Tischplatte aus antiker Eiche mit Asteschlüssen und Rändern, die der Platte eine unregelmäßige Form geben.

Board - стол с металлическим каркасом и деревянной столешницей, прямоугольный, фиксированный или раздвижной. В столе Board превосходно сочетается основание из крашеного металла геометрической формы и столешница из античного дуба, характеризующаяся кромкой и неправильным профилем.
