

Ciak / Pouf poggiapiedi pieghevole Design / Stefan Diez / Christophe Pillet

Test EN581-1 / EN581-2

Exploration of form, attention to detail and a blend of technological materials are the hallmark features of Ciak, the contemporary director's chair by Stefan Diez. Simple and sophisticated, Ciak is a perfect blend of function and design. The spiral shape of the aluminium framework and the high-performance fabric are the signature features of the seat, creating a solid, durable outdoor product, suitable for a variety of settings.

Description

Code: 975

Line: **EMU Advanced**Typology: **Footrest**Collection: **Ciak**

Folding: Yes

Static Load: 200 Kg Test: EN581-1 / EN581-2

Technical Info

Width: 42 cm Depth: 48 cm Height: 38 cm Weight: 2.9 Kg Static Load: 200 Kg Seat Cushion:

Packaging

Packages: 1
Pieces for pack: 1

Dimensions: 63x14x46 cm

Materials

Aluminium

Aluminium alloys, particularly suitable for cold-working and for die-casting, appropriately treated to withstand the elements and powder coated.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter.

Emu-tex

It is a technical fabric for outdoor use made with polyvinyl chloride thread. It features exceptional strength to ensure durability: maximum resistance to UV rays, the elements, humidity and sudden changes in temperature.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter. Avoid prolonged contact with greasy substances and/or dyes, which may be absorbed by the coating material, causing permanent staining and deterioration of the yarn structure. Frequent washing: use water and non-abrasive, colourless liquid detergents with neutral PH. Leave the detergent to react for a few minutes, if required Rinse thoroughly with water at a temperature not exceeding 30°C. If pressurised devices are used, keep the diffuser tip at least 60/70 cm away from the surface of the item. Repeat the operation if necessary.
