HEXAGON —

Steven Holl, 2011

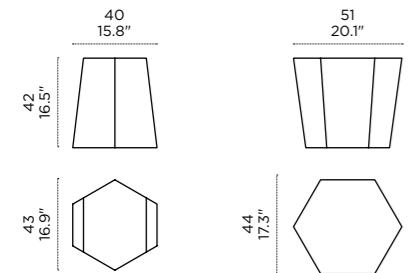

Hexagon is a modular system composed of two irregular hexagons supporting each other, which allows for the creation of endless compositions for every need. It can be used as stool, bench or side table, both indoor and outdoors. It is available in Lecce stone or okoumè wood. The latter, also known as Gaboon, is native of tropical West Africa, hence it withstands humidity and light rain. The Lecce stone is a limestone typical of the Salento region in Puglia, superbly suited to withstand severe weather conditions.
