

Thor / Sedia
Design / Chiaramonte / Marin

Test
EN581-1 / EN581-2

Inspired by hand-forged metal, the Thor collection features characteristic lines enhanced by the unusual assembly of the elements. Thor includes two models, chair and stool, graced with an elegance that make them ideal for both residential and contract settings.

Description

Code: **655+659**
Typology: **Chairs**
Collection: **Thor**

Stackable: 8
Static Load: 200 Kg
Test: EN581-1 / EN581-2
Seat Height: 46.5 cm

Technical Info

Width: **52 cm**
Depth: **55 cm**
Height: **80 cm**
Weight: **7.9 Kg**
Static Load: **200 Kg**

Packaging

Packages: **1**
Pieces for pack: **4**
Dimensions: **102x72x60 cm**
Volume: **0.440 mc**

Polyethylene bag and cardboard box

Colors

Marine Blue - Teak

Matt White - Teak

Ice White - Teak

Dark Blue - Teak

Blue - Teak

Cloud Grey - Teak

Corten - Teak

Military Green - Teak

Black - Teak

Grey/Green - Teak

Scarlet Red - Teak

Curry Yellow - Teak

Cement - Teak

Sand - Teak

Antique Iron - Teak

Maple Red - Teak

Indian Brown - Teak

Green - Teak

Taupe - Teak

Dark Green - Teak

Materials

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosio process.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.

Teak

Traditional wood used for outdoor furniture with an exotic and timeless appeal. Teak is a hard wood with a high oil content suitable for outdoor use, without the need for painting. If it does not receive any protective treatment, the surface will weather into a silvery-grey finish, the natural protection of the internal part of the wood, considered an essential part of teak's charm. The teak used for EMU products is FSC® certified.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.

As it is a natural material, changes in colour or cracks due to the level of humidity and sudden changes in temperature may be observed. If it does not receive any maintenance treatment with the periodic application of common and specific oil-based protective products, the surface will weather into a silvery-grey finish that can be removed with light surface sanding and subsequent polishing with a hessian cloth. Small surface stains caused by oil or other foodstuffs must be removed immediately, before the wood absorbs them, by sanding the area concerned and polishing it with a hessian cloth. When the wood is wet for the first time, it is normal for the surface to become slightly rough when it dries; the initial polished-effect can be restored with light surface sanding and subsequent polishing with a hessian cloth.
