Intensive Certificate

1 SYNCHRO MECHANISMS

The synchronised tilt system offers the possibility of adjusting the maximum angle of inclination of the backrest in 4 positions. The user determines the maximum tilting point, which can be locked in the upright position. At the same time, the tension adjustable offers the possibility to apply strength tension to the back in a quick and efficient way.

By operating the handle (A) in one of its four possible positions the maximum tilt angle is determined and turning handle B in one of the positions, it will provide more or less tension to the back

Synchron lockable at 4 positions

Tension Control Knob

2 SEAT HEIGHT ADJUSTMENT

Seat height adjustment is controlled with a gas lift. The mechanism is activated pressing handle (C) which is under the seat in the right hand side (sitting in the chair) up.

Gas lift

Backrest maximum and minimum height

3 SEAT SLIDE

Horizontal seat slide movement it is used to adjust the seat deep towards the back rest depending on the user's anthropometric characteristics. To activate the mechanism, press handle (D) placed in the right hand side, under the seat. Zipper system with 5 positions. A self-return system moves the seat towards the backrest when the handle is activated without any weight pressure in the seat.

Sliding seat lever

5 different positions. Depth adjustment with auto-return mechanism

4 LUMBAR ADJUSTMENT (serie 30)

Offers a **lumbar height adjustment system (E)** manufactured with a flexible and adaptable material with an adjustment range of 5 cm. A combination of use of mesh materials and lumbar adjustment provides a fully adaptable solution strengthening the support on those points where the tension is higher.

- Flexible Polypropylene (PP)+35% fiber glass. White, drak grey and black

5 OPTIONAL HEAD-REST (serie 30)

Available a Head-rest for **Winner 30** model. [25,5 x 16,5 cm].

Two model availables:

- Flexible Polypropylene (PP)+35% fiber glass. White and black
- Polypropylene(PP) frame. Technical mesh upholstered

Polypropylene(PP) fixing and adjustable piece. **5 Different positions. Maximum Height adjustment 6 cm.** Tilt mechanism.

Elastic mesh

6 AIR COMFORT SYSTEM

The seat foam has been designed with air chambers, that absorb pressure and decompress the foam in an adaptive and responsive way. This improves comfort, flexibility and provides for better pressure distribution

ACS

7 ADJUSTABLE ARM-REST

WINNER offers 2 arm options: aluminium or polypropylene arms.

Height adjustment: adjustable using the knob under the arm-rest (**F**), it offers 7 height positions.

Distance between arms: Manual width adjustment using the level under the seat (**G**), each arm range adjustment is 3 cm, so maximum total width is 6 cm.

360° Swivel arm system (Anti-panic): Only available with the aluminium arm option, 360° Swivel arm movement allowing horizontal rotation of arm rests.

POLYPROPYLENE ARM

Polypropylene arms. Manual width adjustment

ALUMINIUM AND POLYPROPYLENE ARM

Height adjustable arm

360° Swivel arm movement

LOCKED
- without movement
(Only in positions 0° and 180°)

UNLOCKED
- with movement

8 CASTORS AND CAPS

Soft band 65 mm anti-skid castors in black finish. **Optional Security castors** with auto-lockable system, avoiding the undesired chair move (when sitting the castors move normally but when stand up the castors auto-lock). **Black Polypropylene (PP) caps** with antiskid rubber.

Black castor

Weight control castors

Antistatic castors

Black caps

1 A correct posture at work to avoid physical problems

Seat adjustment.

Forearms must be parallel to the desk top as in a right angle with the rest of the arm. Both feet must be lean on the floor and knees must be in right angle too.

Adjustable arms (5 positions)

Place the chair arms in the lower position to get better mobility. For statics works, adjust height and distance to that point where the forearms perfectly lean.

Lumbar Support Adjustment

Adjust the Lumbar support height to get the back totally rested and the weight totally supported.

2 Different ergonomics conditions and specific mobility for each task

It is necessary to alternate daily dynamic and static tasks.

Dynamic tasks.

Document manipulation, communication and so on...Free the synchro mechanism and adjust weight and height. Place armrests in the lower position

Torsion.

Flexible back whose movements go naturally with the user action.

Static work

Document analysis and writing, intensive computer work...

Blocked synchro mechanism and use armrests properly

Dynamic tasks.

Torsion.

3 Incorrect Postures

Key points.

- 1. A lower position from the desk produces neck pain.
- 2. An incorrect back support produces lumbar problems.
- 3. Legs too stretched or too vended causes body joints over-stressed.

■ **DESCRIPTION**

Operative office chair, 5 Star base; aluminium base and polyamide with glass fiber (FV). Anti-skid castors standard use or weight control use. Moulded foam PU flexible de 75-80kg/m³, density **back** with inner metal frame tube Ø 16 x 1,5 mm, upholstered in different fabrics. Two different models, **headrest** or **without headrest**. Moulded polypropylene **Seat** black polypropylene (P.P) cover seat with injected foam PU flexible de 55-60kg/m³ density, upholstered with fabrics. Height adjustable system by gas lift. Depth seat adjustment (40 mm). Return spring system.

■ **BASES AND CASTORS**

Black Polyamide - Ø 67,5 cm
Black anti-skid castor, Ø 65 mm soft band

Silver aluminium - Ø 67,5 cm
Dark grey anti-skid castor, Ø 65 mm black soft band

Polished aluminium - Ø 67,5 cm
Black anti-skid castor, Ø 65 mm black soft band

- ① Upholstered moulded foam PU flexible de 75-80kg/m³
- ② **WITH PIVOTING ARM 360°:**
A. SEBS of 3 mm, **B. ABS** of 3 mm, **C.** Height adjustment, **D.** Component by solid aluminium 20 x 30 mm thickness or PP +30% F.V.
- WITHOUT PIVOTING ARM 360°:**
A. SEBS of 3 mm, **B. ABS** of 3 mm, **C.** Height adjustment, **D.** Component by Polypropylene with glass fiber
- ③ Moulded foam PU flexible foam seat upholstered in different finishes
- ④ Patented synchro-evolutive knee-tilt mechanism. Four positions
- ⑤ Gas lift
- ⑥ 5 star base. Moulded aluminium or polyamide
- ⑦ Anti-skid castors, standard castors or optional hole weight control castor

■ **SIZES**

Total height: from 960 to 1.060 mm/ from 1140 to 1240 mm (headrest)
 Total width: from 675 mm
 Total depth: from 675 mm
 Seat height: from 400 mm to 500 mm
 Seat width: from 480 mm to 530 mm
 Seat depth: from 430 mm to 490 mm

*Measures according to UNE-EN 1335-1

STANDARDS

WINNER has passed tests done in our technical department as well as the tests done in AIDIMA the Technological Institute for furniture.

The tests correspond to:

Office chairs, Standard from 2009

- UNE-EN 1335-1:01. Office furniture. Office chair. Part 1: Dimensions. About dimensions
- UNE-EN 1335-2:09. Office furniture. Office chair. Part 2: Security requirements
- UNE-EN 1335-3:09. Office furniture. Office chair. Part 3: Security tests.
- BS 5459-2:2008. Specification for performance requirements and tests for office furniture. Office pedestal seating for use by persons weighing up to 150 kg. and for use up to 24 hours a day, including type-approval tests for individual components.

■ DESCRIPTION

Operative office chair, 5 Star base; aluminium base and polyamide with glass fiber (FV). Anti-skid castors standard use or weight control use.

Backrest polyamide (glass fibre) frame. Upholstered with foamized fabric composed of polyurethane foam 5mm + fabric "T" or 10mm polyurethane foam + fabric M.

Seat black polypropylene (P.P) cover seat with injected foam PU flexible de 55-60kg/m³ density, upholstered with fabrics. Height adjustable system by gas lift. Depth seat adjustment (40 mm). Return spring system.

■ BASES AND CASTORS

Black Polyamide - Ø 67,5 cm
Black anti-skid castor, Ø 65 mm soft band

Silver aluminium - Ø 67,5 cm
Dark grey anti-skid castor, Ø 65 mm black soft band

Polished aluminium - Ø 67,5 cm
Black anti-skid castor, Ø 65 mm black soft band

■ SIZES

Total height: from 960 mm to 1.060 mm Seat height: from 400 mm to 500 mm
