

PEDRALI[®]
THE ITALIAN ESSENCE

YPSILON 4790T

DESIGN:
JORGE PENSI DESIGN STUDIO

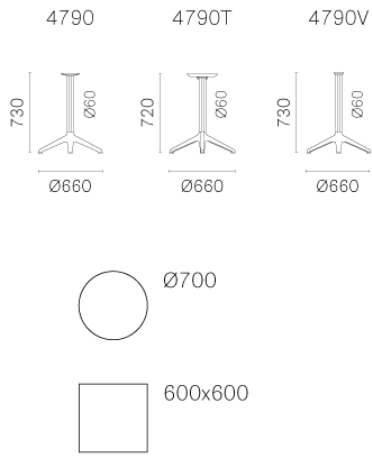

Ypsilon table base is conceived to "orbit" on beaches, terraces and gardens, that is to resist to summertime high temperatures, and made of an aluminium structure that will keep it always cold. An aluminium extruded tube that extends itself towards the legs of its casted base, in the same material, giving to the whole shape coherence. Ypsilon leans itself on the floor softly, with transparent plastic feet, just like as it would be floating in the space that contains it. An optional peculiarity: the raisable top, that makes it stackable, thanks to an articulated joint. Suitable for laminate, compact or stainless steel top, folding top.
